

Fall 2021

Detailed Balance Sheets

- Added columns for Year Purchased, Purchase Price, Year Sold, and Sales Price in detail for all personal assets. This is mainly for information purposes, but can be used to complete capital purchases and sales detail in FINAN, Earned Net Worth Analysis, and Schedule F Cash to Accrual Analysis.

C & I Business Analysis (commercial)

- Updated RMA Annual Statement Studies data for 2021-22.

Cash Flow Projection (FINFLO)

- In crop sales detail, added "Select from Balance Sheet" icon to the toolbar to allow selecting crop beginning inventory from the balance sheet for sales.
- Added "Accounts payable" in the expense list when using the Schedule F chart of accounts so paying down beginning accounts payable can be shown in the projection.
- In accounts payable detail, added "Select from Balance Sheet" icon to the toolbar to allow selecting detail from accounts payable on the beginning balance sheet.
- In other farm income detail, added "Select from Balance Sheet" icon to the toolbar to allow selecting detail from accounts receivables on the beginning balance sheet.
- Fixed calculation issue with breeding livestock enterprises with transfers out that were not displayed in the production summary. This impacted annual projections and monthly projections without enterprise budgets.

Presentations

- Implemented new text editor component for the presentation.
- Added ability to embed trend reports in the body of a presentation besides having it as an attachment. This is defined in the presentation template.
- Added ability to print a presentation to a *.docx file (Microsoft Word-compatible). This is available in the print dialog of a presentation.
- Coming Soon – Expanded loan and account table types in a presentation template. Table types include loans from collateral analysis (same as before), loans from a balance sheet without collateral analysis, loans from FINPACK+ core interface, and accounts or deposits table from FINPACK+ core interface.
